

molten

LA TECH WEEK

Official a16z LA Tech Week event
Fri-Sat · Oct 16-17, 2026
Los Angeles · #LATechWeek

Build the Space Around You

24-HOUR HACKATHON · OCT 16-17, 2026 · LOS ANGELES

The build

MOLTEN is a 24-hour hackathon that pushes the best young builders to ship spatial software that finally uses the body as an input. Spatial computing keeps shipping better hardware than software, so the best headset in the world still runs a floating browser. MOLTEN gives students the headsets, APIs, and creative space to fix that in one weekend.

24 HRS

continuous build

120

vetted hackers

5

spatial tracks

20–30

working demos

100%

technical + creative talent

CS · design · film · XR · robotics · USC · UCLA · across LA

The Venue Ask

One Los Angeles Venue

Open floor space for ~120 builders, tables + power, ceiling clearance for headset demos, and Wi-Fi for 250+ devices. We design the layout around your space.

Overnight Access

Sat noon to Sun noon.
Best: continuous 24-hour access.

What sponsors get

Billing

Screened LA + Bay technical talent · opt-in resume book · recruiting space at higher tiers

Front-row Access

A judging seat + private walkthrough before the demo expo opens

Community

Direct access to screened spatial talent for recruiting, community, or deal flow

Venue Checklist

Cash + in-kind

Venue Provides	Ideal Setup	We Handle
Space	Open floor for ~120 hackers	Layout, load-in
Power	Tables + abundant outlets	Floor reset
Internet	Wi-Fi for ~120 hackers	Usage guidance
Access	From Saturday ~12PM to Sunday ~2PM	Staffing
Operations	Restrooms + load-in access	Catering, cleanup, waivers

Vision Pro secured as grand prize · Stage time starts at Track Sponsor · In-kind value counts at 50% toward cash tiers · One track per sponsor; first committed, first served

100% of funds go to hackers · Venue, catering, and prizes · No middlemen, no agency fees
First-committed sponsors get first pick of tracks. Early sponsors shape the event — lock in by Oct 9, 2026.

Who's backing us

Communities with 20K+ combined followers; past events with NVIDIA, OpenBCI, and projects with Apple, Snap, Netflix, and Google.
